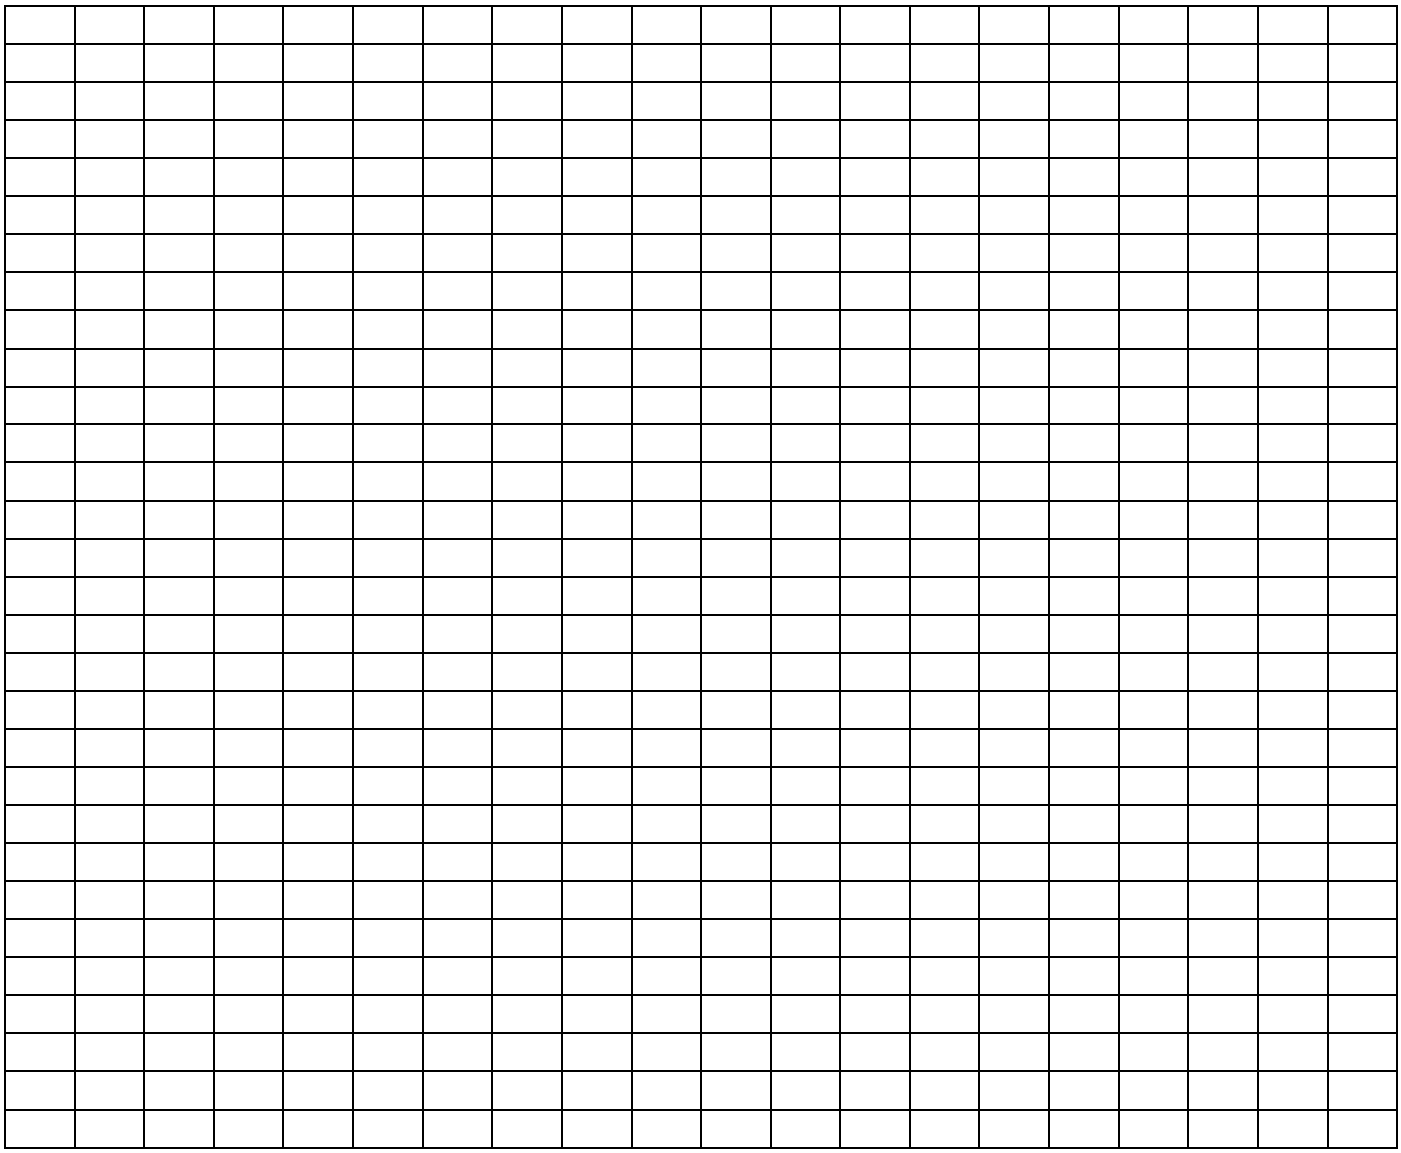
Directions for Mad Minute Practice at Home:

Parents, please supervise your child as s/he does the three steps below. Sign and date the graph to show that your child has completed the three steps.

1. Do a **one-minute practice** of the assigned Mad Minute. Indicate the number correct on the graph.
2. Complete the unfinished problems in that assigned Mad Minute.
3. Complete one page of the Mad Minute at the next level above, un-timed, until both Multiplication and Division have been passed in class.



Top line = date
Bottom line = parent initials

Graph the number correct as a dot ON the vertical line. Only the first Mad Minute is graphed, but two Mad Minutes should be completed before the parent initials the graph.
